Add a movie

ID and Name:	7 – Add a movie		
Created By:	Lasse, Emil and Daniel	Date Created:	03.09.2019
Primary Actor:	Site admin	Secondary Actors:	
Description:	The admin adds a movie		
Trigger:	Site admin selects Add a movie		
Preconditions:	1. The site admin is logged in to a admin account.		
Postconditions:	1. The movie is created on the site and is hidden or shown to everyone.		
Normal Flow:	1. The system shows all the options for the site admin. 2. Actor chooses "Create movie". 3. The system displays a form where information can be added too (Picture, name, description, etc.). 4. Actor fills all the information about the movie. 5. The system askes to confirm the added information. 6. Actor confirms the information. 7. The system askes to make the movie shown or hidden. 8. Actor makes the movie either shown or hidden.		
Alternative Flow:	• At step 5, actor fill information that doesn't add up to the needed information type, he can't confirm the information. • At step 7, actor doesn't confirm, the movie won't be added. • At step 9, actor doesn't choose shown or hidden, it will automatically be hidden.		
Exceptions:	• The movie is already on the site. • Not all information is added to the information form		
Priority:			
Frequence of Use:			
Business Rules:	The system sends a notification to those who get notifications about new movies
